

Leave it to our brilliant elected officials in Congress to find a way to stifle competition and block access to a service that millions of Americans WANT! Representatives Pickering and Green are co-sponsoring a bill that goes directly against our free enterprise system. I and the million or so other subscribers to XM Satellite Radio pay for this service because it provides a valuable service and outstanding entertainment -- all without my family and me having to listen to some vulgar, egotistical disc jockey. Congress and the FCC have done little to keep the value and class in the product that comes across the public airways. I'd much prefer that you and your counterparts on the Hill keep your hands off of satellite radio. Please reject NAB's petition 04-160.
